

Price Assure™ provides automatic savings on generic medications

Price Assure, offered through a partnership between Express Scripts and GoodRx®, an independent company, is a seamless way for your employees to potentially save money on certain non-specialty **generic drugs** at the point of sale. When an employee fills a prescription at an in-network retail pharmacy that participates with GoodRx, the benefit cost is automatically checked against pricing available through GoodRx, and your employee automatically receives the lower price when applicable. There is nothing more your employee needs to do, and the transaction amount will count toward their deductible and accumulators.

Instant Savings The program provides real-time resolutions at the point of sale, ensuring immediate benefits.

Deductible Contributions Payments made through the program are counted toward a member's deductible and contribute to their maximum out-of-pocket expense accumulations.

Medication Safety Checks Each prescription is thoroughly assessed for potential drug interactions and medical alerts, prioritizing member health.

Zero Employee Cost Employees can participate in the program without incurring any fees, enabling accessible savings.

Hassle-Free Process The price comparison between a member's benefit cost and what is available through Price Assure will happen automatically at the point of sale.

This innovative program ensures that safety checks are in place for each prescription, and employees will pay the lowest possible price for certain generic medications, excluding specialty generic drugs.

What drugs are included

Price Assure is a discount program for generic drugs, excluding specialty generic drugs.

Best price for member with claim visibility maintained

Employees have confidence in the automatic clinical review of prescription claims offered by Univera Healthcare. Price Assure offers an integrated point-of-sale solution to leverage the benefits of certain cash discounts.
