Eat the right amount of calories for you

Calorie limit

Staying within yours can help you get to or maintain a healthy weight. People who are successful at managing their weight have found ways to keep track of how much they eat in a day, even if they don't count every calorie.

- Enjoy your food, but eat less.
- Cook more often at home, where you are in control of what's in your food.
- When eating out, choose lower calorie menu options.
- Write down what you eat to keep track of how much you eat.
- If you drink alcoholic beverages, do so sensibly—limit to 1 drink a day for women or to 2 drinks a day for men.

Be physically active your way

Pick activities that you like and start by doing what you can, at least 10 minutes at a time. Every bit adds up, and the health benefits increase as you spend more time being active.

Understanding how different foods and amounts affect blood sugar

Starches and sugars (carbohydrates) have more effect on blood sugar than protein or fat. Carbohydrates include foods such as bread, pasta, cereal, beans, milk, fruit and fruit juices, and sweets. Keeping track of the carbohydrate foods you eat is a key factor in controlling your blood sugar. Carbohydrates have the greatest impact on your blood sugar after meals, and your blood sugar level can go too high when you eat more carbohydrates than your body can use. By keeping track of the carbohydrates you eat and spreading them throughout the day, you can help control your blood sugar.

In order to count carbohydrates, it's helpful to have a meal plan and know the average carbohydrate values of various food groups.

Talk to your healthcare provider, dietitian or diabetes educator about how many carbohydrates you should have at each meal.

Most of the carbohydrates we eat come from three food groups: starch, fruit and milk. Vegetables also contain some carbohydrates, but foods in the meat and fat groups contain very little carbohydrates. The total amount of carbohydrates in a food affects blood sugar levels more than does the source of carbohydrates or whether the source is a starch or sugar.

This list shows the average amount of carbohydrates in each food group per serving:

Carbohydrate grams			
Starch	15	Vegetable	5
Fruit	15	Meat	0
Milk	12	Fat	0

To make things easy, many people begin carbohydrate counting by rounding the carbohydrate values:

One serving of milk, starch, or fruit = 15 grams of carbohydrates or one carbohydrate serving.

Three servings of vegetable = 15 grams of carbohydrates. One or two servings of vegetables do not need to be counted (with the exception of starchy vegetables like corn, potatoes, squash). Each meal and snack will contain a total number of grams of carbohydrates.

Counting carbohydrates allows flexibility in your meal plan, but you can't abandon your meal plan and eat as many carbohydrates as you desire. Remember to consult your health care team before making any of the changes discussed here.

The basic facts about diabetes

Diabetes is:

Controllable - Though there is no cure for diabetes, it can be managed by keeping blood sugar levels close to normal. This is done with proper meal planning, exercise and possibly medicines.

Lifelong - Your blood sugar levels should improve with treatment. However, this does not mean that your diabetes has gone away. It just means your blood sugars are in control.

Self-managed - Your healthcare team will advise and support you, but control depends on you. The choices you make help determine what your blood sugar level will be.

Always changing - It is common for your healthcare provider to change your medicine or treatment plan over time because your diabetes changes over time.

Lemon herb turkey

Ingredients

2 tbsp olive oil	Salt, to taste
1 lemon, juiced	Black pepper, to taste
1 tsp thyme, chopped	1 large bunch of fresh thyme
1 fresh turkey, 10-12 lbs.	1 lemon, halved
	1 onion, quartered

Directions

1. Preheat oven to 350 degrees.
2. In a small bowl, mix the olive oil, lemon juice and chopped thyme leaves. Set aside.
3. Wash the turkey inside and out, and pat the outside dry.
4. Place the turkey in a large roasting pan. Salt and pepper the inside of the turkey cavity. Stuff the cavity with the bunch of thyme, halved lemon and quartered onion.
5. Brush the outside of the turkey with the oil mixture and sprinkle with salt and pepper. Tie the legs together with string.
6. Roast the turkey about 2½-3 hours, or until the juices run clear. Remove the turkey to a cutting board and cover with aluminum foil. Let rest 20 minutes.
7. Slice the turkey and serve.

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.		

- 1 Serving size:** First, look at the serving size and the number of servings in the package. All the information on this label is based on this serving or portion size. If you eat double the serving, you will consume double the calories, carbohydrate, fat and other nutrients.
- 2 Calories:** Calories provide a measure of how much energy you get from a serving of this food. This gives the total calories per serving. The portion of the total calories that comes from fat is also given. A good rule of thumb is to look for foods that show one-third or fewer of the total calories coming from fat.
- 3 Total fat:** This gives the total grams of fat in one serving of that food.
Unsaturated fat: You can find the amount of unsaturated fat by subtracting the amount of saturated and trans fats from the total fat. Eating more unsaturated fats than saturated fats can help lower blood cholesterol levels. Most unsaturated fats come from plant sources and include canola, vegetable and olive oil.
Saturated, trans fat and cholesterol: Eating too much fat may increase your risk of certain chronic diseases, such as stroke, and some types of cancers.
- 4 Sodium:** This shows the amount of sodium (salt) in one serving. This is important if you are on a low-sodium diet or if you have high blood pressure.
- 5 Total carbohydrate:** Includes starches, fiber and sugars. The fiber and sugars are also listed separately to help you make good decisions.
- 6 Dietary fiber:** This shows the portion of the total carbohydrate per serving that is fiber. Eating a diet high in dietary fiber promotes healthy bowel function.
- 7 Total sugars:** This shows the amount of carbohydrate per serving that comes from sugars. This includes both natural sugar and added sugars. Try to minimize added sugars.
- 8 Protein:** This shows the total grams of protein in one serving. Protein is an essential nutrient for growth and health.
- 9 Vitamins and minerals:** Eating enough of these nutrients can improve your health and help reduce the risk of some diseases and conditions.

Baked balsamic asparagus

Ingredients

- 1 lb fresh asparagus, trimmed
- 2 tbsp olive oil
- 2 tbsp balsamic vinegar
- ¼ tsp salt
- ¼ tsp black pepper

Directions

1. Preheat oven to 350 degrees. Cut a sheet of aluminum foil 18 inches long.
2. Place the asparagus on the foil; drizzle with oil and vinegar then sprinkle with salt and pepper.
3. Seal the foil packet and place it on a baking sheet.
4. Bake 12 to 15 minutes, or until the asparagus is tender. Open the packet carefully, and serve.

Wild mushroom soup

Ingredients

16 oz assorted mushrooms (white, oyster, cremini, shiitake), sliced	4 cups low sodium chicken or vegetable broth
1 onion, diced	¼ tsp salt
1 tsp olive oil	¼ tsp pepper
1 stalk celery, diced	½ cup evaporated milk
2 cloves garlic, minced	1 bay leaf
2 tbsp flour	Sliced mushrooms for garnish

Directions

1. In a soup pot over medium heat, add oil, onion and celery and saute until onions turn clear (about 5 minutes).
2. Add mushrooms and saute until soft and all liquid is evaporated, about 10-12 minutes. Add garlic and saute 1 more minute.
3. Add flour to pot and saute for 2 minutes. Then slowly add broth while stirring.
4. Add bay leaf, salt, and pepper. Bring to a boil, then reduce heat and simmer for 10 minutes.
5. Add evaporated milk and simmer for 1 minute. Remove bay leaf and puree soup with immersion blender or in batches in blender.
6. Garnish with additional sautéed mushrooms if desired.

A close-up photograph of several rectangular granola bars. The bars are golden-brown and densely packed with ingredients including rolled oats, sliced almonds, and small pieces of dried fruit, likely cranberries and raisins. They are arranged diagonally on a rustic wooden surface. An orange rounded rectangle is overlaid on the top left, containing the title text.

Orange and apple bars

Ingredients

1 cup old fashioned oats	¼ tsp baking soda
1 cup whole wheat flour	2 egg whites
¼ cup sugar	3 tbsp canola oil
½ tsp ground cardamom	1 orange, zested and juiced
¼ tsp ground nutmeg	1 ½ cups apple butter

Directions

1. Preheat oven to 350 degrees. Lightly spray an 8" square baking dish with non-stick cooking spray.
2. In a medium bowl, stir together oats, flour, sugar, cardamom, nutmeg, and baking soda.
3. In a small bowl, lightly beat the egg whites with a fork. Stir in the oil and 2 tbsp fresh orange juice.
4. Add the egg mixture to the oats mixture, stirring until the combined mixture holds together. Press $\frac{3}{4}$ of the mixture into the baking dish.
5. In another bowl, whisk together the apple butter with 2 tsp orange zest. Using a rubber scraper, spread the fruit butter mixture over the oatmeal mixture. Sprinkle remaining oatmeal mixture on top.
6. Bake for 30-35 minutes or until the top is golden brown. Cool completely before cutting into 24 squares.
